

Ending the HIV Epidemic in the U.S. (EHE)

Initiative Data: 2022

HRSA's HIV/AIDS Bureau (HAB)

CLIENTS SERVED IN EHE JURISDICTIONS

The majority of new HIV transmissions come from people who are not aware they have HIV or are not receiving any HIV care.¹ In 2022, HAB EHE-funded providers served

22,001

clients new to care

19,204

clients estimated to be re-engaged in care²

This is nearly double the number of new and re-engaged clients served in 2020.

In Year 3 of the EHE initiative **alone**, approximately 15% of people in EHE jurisdictions who were undiagnosed or not in care were brought into care and served by HAB EHE-funded providers,³ compared with approximately 20% in the first two years **combined** of the EHE initiative.

EHE funding reached people with HIV who were new to care or not engaged in care by

Delivering rapid antiretroviral therapy services

Addressing social determinants of health, including housing, mental health, and substance use

Supporting client navigation through community health workers and peer support

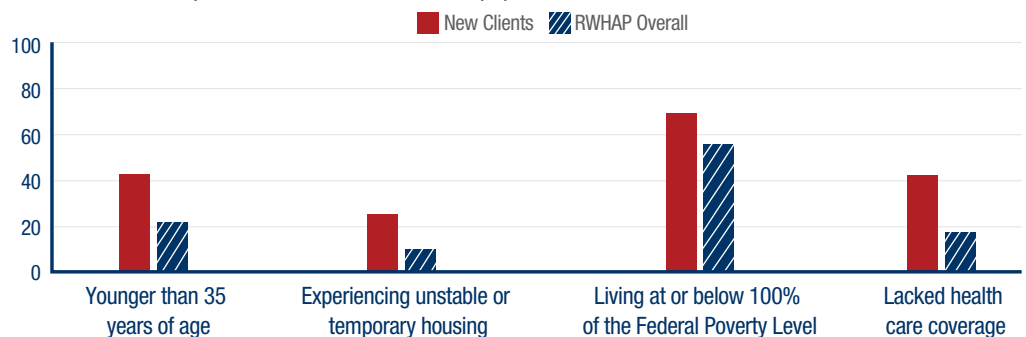

Developing the HIV workforce, including people with lived experience

Among Clients New to Care in 2022

By the end of 2022, **79.2%** of clients who were new to care and were receiving HIV treatment **reached viral suppression**, which means they cannot sexually transmit HIV to their partner and can live longer and healthier lives.

Compared with the overall RWHAP population,⁴ more clients new to care were:

HIV WORKFORCE TRAININGS

Ryan White HIV/AIDS Program (RWHAP) Part F **AIDS Education and Training Centers (AETCs)** expand the capacity of the HIV health care workforce by **training** and **supporting** health care team members and students in EHE jurisdictions.

From July 2021 through June 2022, RWHAP Part F AETC Program Recipients

conducted **483** EHE-funded trainings, a sevenfold increase from July 2019 through June 2020

reached **4,646** HIV care professionals
