

Housing and HIV-Related Health Care Outcomes Among HRSA's Ryan White HIV/AIDS Program (RWHAP) Clients in 2023

HIV Viral Suppression Among RWHAP Clients by Housing Status

Nationally,

90.6%

of all RWHAP clients receiving HIV medical care **reached viral suppression**, which means they cannot sexually transmit HIV to their partners and can live longer and healthier lives.

79.7%

of clients with **unstable housing reached viral suppression**

85.2%

of clients with **temporary housing reached viral suppression**

91.6%

of clients with **stable housing reached viral suppression**
